

Corporate HR

Hire and train the best talent by standardizing your global language screening process

Fully-automated language assessments

- ✓ Capture top talent by outpacing the competition through our immediate results
- ✓ Increase your talent pool while streamlining your global recruiting process
- ✓ We match specific language assessments to meet your business needs
- ✓ We offer tailored questions uniquely designed for corporate screening and training
- ✓ Provide a professional and impressive language assessment experience for your potential employees

Talent Acquisition

The successful acquisition of global talent is the greatest advantage the 21st century business can use to maintain a dominant position ahead of the competition. Top experts believe the use of artificial intelligence will greatly disrupt the hiring process. Using our AI-driven, adaptive language assessments, we are able to provide accurate and instant results. Not only are our assessments the most advanced; we also use data from industry leaders to provide you with actionable intelligence. For example, would you like to know which benchmarks top businesses are using? We can provide that. Would you like to know trends, results, best practices, and strategies for testing your candidates? We can provide that, too. We don't just test, we test with purpose.

Scale Fast, Fly High

Unlike many other language assessment services that rely on human rating, we utilize AI and machine learning to remove the ambiguity and bias behind human rating. Our patented technology is the most valid and reliable automated language assessment. Our assessments align with top industry standards (CEFR, ACTFL, TOEFL, IELTS, and TOEIC), and we also have data that will provide you with the best practices in your industry. Now, your results can have a meaningful impact on your business—and on your success as a recruiter or trainer.
